

GOOGLE SEO INTELLIGENCE REPORT

weareams.com

Prepared by Claude SEO

April 06, 2026 All Google APIs

Table of Contents

1. Executive Summary

Key Metrics, Critical Issues & Quick Wins

2. Recommendations

Prioritized Action Items

3. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive Google SEO analysis of **weareams.com**, generated on April 06, 2026. Data was collected from Google PageSpeed Insights, Chrome User Experience Report (CrUX), Google Search Console, and the URL Inspection API as available.

2. Recommendations

Prioritized action items based on the data collected. Items are ranked by expected impact on search visibility and user experience.

No critical issues detected. Continue monitoring Core Web Vitals and search performance regularly.

Implementation Roadmap

Week 1 — Quick Wins

- Verify all monitoring dashboards are active

Week 2–3 — Performance & Indexation

- Maintain current performance levels and monitor trends

Week 4 — Content & Search Optimization

- Review and improve content depth for underperforming pages
- Set up ongoing monitoring and reporting cadence

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)

Report generated by Claude SEO — Google SEO Intelligence Skill — April 06, 2026
Methodology based on Google Web Vitals thresholds, Search Console documentation, and Lighthouse scoring algorithms.
